

# Maltese

This little dog has a very soft coat and will mat very easily. Some say that if you look at it the wrong way it will mat. Most people do not keep this little cutie in a full coat because of this issue. A good, easier to maintain all over length can be achieved using a #3 or 4 guide comb. You can go longer or shorter depending on how often you are willing to brush your dog or how often you will be grooming your dog. Recommended grooming is every 4 to 6 weeks.

Most people will also cut the hair on the head to match the body so that you don't have to tie it up with a rubber band. You can use either the same guide comb or go 1 blade longer.

| Trim feet with scissors.
