

# Sealyham Terrier

This is a harsh coated little dog and would be hand stripped if showing. If you have one as a pet and you are not showing, you can use clippers on his coat.

Do the top of the head with the same guide comb as the body so that it blends nicely with the body. Shave the cheek, throat and neck with the clipper set to the lowest setting and without a comb. Go with the grain of the coat.

Do the ears with the same blade, taking care to hold your fingers under the edges so you do not cut the ears.

Use a #3 or #2 guide comb on the body, blending down into the longer furnishings on the bottom part of the dog. Terriers can be a little feisty so move slowly and keep encouraging your dog, telling him what a good dog he is.

Trim feet with scissors.
